

Keelin[®]

Little elfin

TK121-S

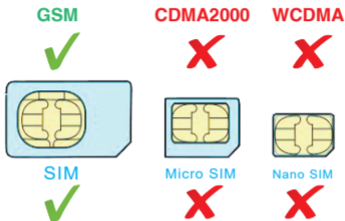

Quick Start Guide

NOTICE

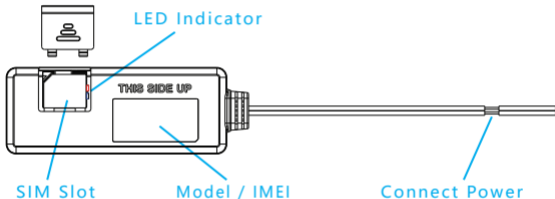

- ① A Standard GSM SIM Card needed, do not support CDMA2000;

- ② GPRS of Sim Card must be opened;
Traffic, SMS, Calls and other SIM card service fee charged by operators;
- ③ Positioning / Remote Power off / Remote command function rely on the network of base station. Device may not work well if the network signal is not very good;
- ④ Product should stay away from fire, high temperature, heat and other extreme environments;

INTRODUCTION

TK121-S General View

LED Instruction

GSM LED (LBS / Base signal, Red)
Quick flash: Searching for base signals
(Not connect yet) ;
Slow flash: Found base signals ;
(Base Connected and LBS start)

GPS (GPS Satellite signal,Blue)
Quick flash: Searching for GPS
Satellite signals (Not positioned);
Slow flash: Found GPS signals ;
(Positioned by GPS)

Function/Parameter

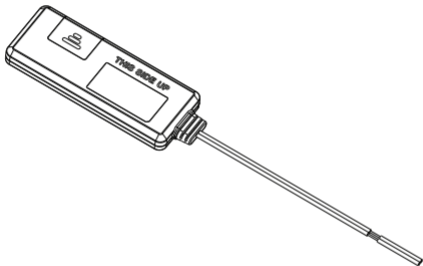

- Supports quad bands, i.e. 850/900/1800/1900MHz
- GPS/LBS double-Positioning mode, support A-GPS
- Wide Input Voltage: 9-72V DC
- GPS data uploaded by GPRS regularly
- Tracking vehicle by WEB/APP/SMS
- GEO-fence alarm, speed alarm
- EELINK Protocol 2.0 (New)
- OTA upgrade firmware

GPS Positioning Accuracy	5-15m (Depend GPS signal)
LBS Positioning Accuracy	About 200m (Depend Bases Density)
GPS Frequency	1575 MHz
GSM Frequency	850/900/1800/1900 MHz
Hot/Warm/Cold Start Time	<3s, <15s, <60s
Input Voltage	9-72V DC
Dimensions (mm)	78.00(L) X 30.58(W) X 10.50(H)
Temperature	-20°C~65°C
Humidity	20%~80%RH
Weight	30 g

1

Insert SIM, Power on, Installation

- Open cover and insert SIM card into device (note direction)
Lift card slightly and carefully to remove it.

- Connect power, device automatically starts up, observe LED and close SIM card cover after device works normally outdoors
- Install device in a suitable position on vehicle.

▶▶ Begin Experience of GPS Tracker

2

Install KEELIN APP, Activate Device

- Scan QR below to download Keelin APP.

- Launch APP , Scan QR on Label to register & activate device

▶▶ Begin Experience of GPS Tracker
